

## HEEE Series, Crimp Connection, 40 pin, Femle insert

Typecode     HEEE-040-FC  
ID                1 007 03 0000142

### Technical Data

| Product Properties                  |                                          |
|-------------------------------------|------------------------------------------|
| Series                              | HEEE                                     |
| Mating with                         | H16B                                     |
| Connection mode                     | Crimp termination                        |
| Gender                              | Femle                                    |
| Rated voltage                       | 500 V                                    |
| Rated current                       | 16 A                                     |
| Rated impulse voltage               | 6 kV                                     |
| Mating contact                      | 16 A(ESF/EGF)                            |
| Number of pins                      | 40                                       |
| Core cross-section/Clamping ability | 0.14~ 4 mm <sup>2</sup> /26 AWG ~ 12 AWG |
| Grounding conductor                 | Yes                                      |
| Pollution degree                    | 3                                        |
| Insulation resistance               | $\geq 10^{10} \Omega$                    |
| Limiting temperature                | -40 °C ~ +125 °C                         |
| Standard                            | EN 60664-1, IEC 61984                    |

| Insert   |          |
|----------|----------|
| Material | PC       |
| Colour   | RAL 7032 |

| Commercial data   |          |
|-------------------|----------|
| Weight            | 0.060 kg |
| Packaging unit    | 5 pc     |
| Country of origin | CN       |

### Features

- High quality engineering plastics
- Crimp termination
- $\geq 500$  Mating cycles
- Approval: CE
- RoHS-compliant
