

DH150 Series

150W Single Output LED Driver

■ Features

- Constant voltage and current output
- Universal AC input 100~305VAC
- Built-in active PFC function
- High efficiency
- Output protections: Short circuit/Over voltage/Over load
- Fixed derating-cutoff type temperature protection
- Cooling by free air convection
- Digital, analog or DALI control dimming function
- Suitable for inside of the outdoor LED luminaries
- IP65 with Vo/Io adjusting screws, IP67 without Vo/Io adjusting screws
- Compliance to worldwide safety regulations for lighting
- Suitable for dry/damp/wet locations

FC 1P65/67 8

General functions

Output Power	150W	Input Frequency	50/60Hz
Input Voltage Range	100~305Vac	Operating Temperature	-40°C~+60°C
Storage Temperature	-45°C~+85°C	Safety & EMC	UL8750, IEC61347, EN55015
Turn-on Delay Time	3.0S max.	Inrush Current	50A at 230Vac, Cold start
Over Temp Protection	Fixed derating-cutoff type temperature protection	Waterproof	IP65/IP67

■ Detailed Specification

TABLE 1:

Note please reconfirm special electrical requirements for some specific system design. 6. Derating may be needed under low input voltages. Please check the Static Characteristics for more details. 7. Safety and EMC design refer to EN60598-1, subject 8750 (UL), CNS15233, GB7000.1, FCC part18. 8. Length of set up time is measured at cold first start. Turning ON/OFF the power supply may lead to increase of the set up time.	Model		DH150-048S315X-YY DH150-036S420X-YY DH150-024S625X-YY DH150-020S750X-YY DH150-012S1250X

 Ripple & noise are measured: at 20MHz of bandwidth by using a 12" twisted pair-wire terminated with a 0.1μf & 47μf parallel capacitor. Output voltage and current can be adjusted by internal potentiometer ("A" type only). Tolerance: includes set up tolerance, voltage line regulation and voltage load regulation. Constant current operation region is within 60% ~100% rated output voltage. This is the suitable operation region for LED related applications, but please reconfirm special electrical requirements for some specific system design. Derating may be needed under low input voltages. Please check the Static Characteristics for more details. Safety and EMC design refer to EN60598-1, subject 8750 (UL), CNS15233, GB7000.1, FCC part18. Length of set up time is measured at cold first start. Turning ON/OFF the power supply may lead to increase of the set up time. 		Net Weight	1.1Kg/pcs

■ Part number code

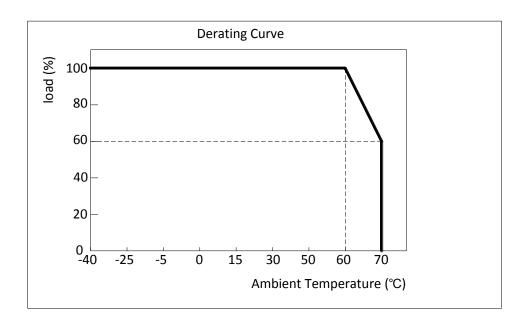

For example: DH150-024S625A-TA means: high efficiency LED driver; output power 150W; output voltage 24Vdc; output current 6250mA; single output; output voltage and current can be adjusted; with DALI dimming function and isolated output.

■ wiring diagram

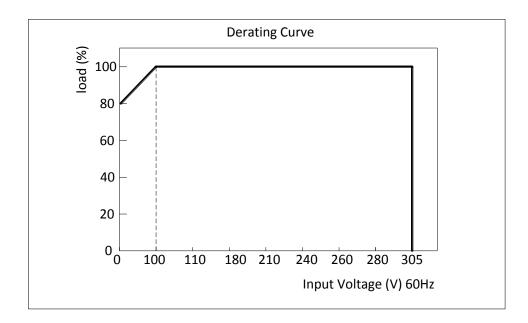

■ Derating Curve

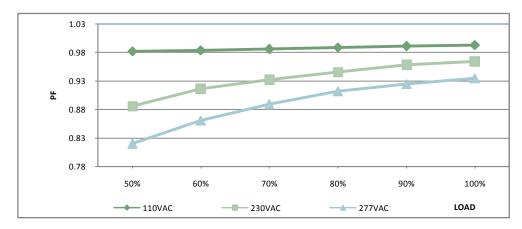

■ Static Characteristics

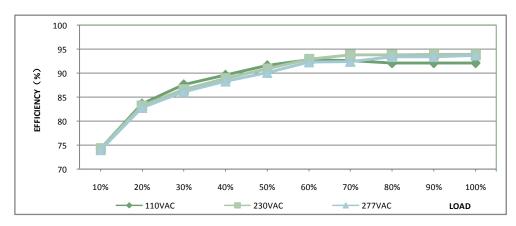

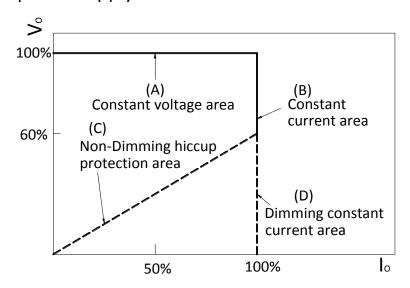

■ Power Factor Characteristic (DH150-024S625)

■ EFFICIENCY vs LOAD (DH150-024S625)

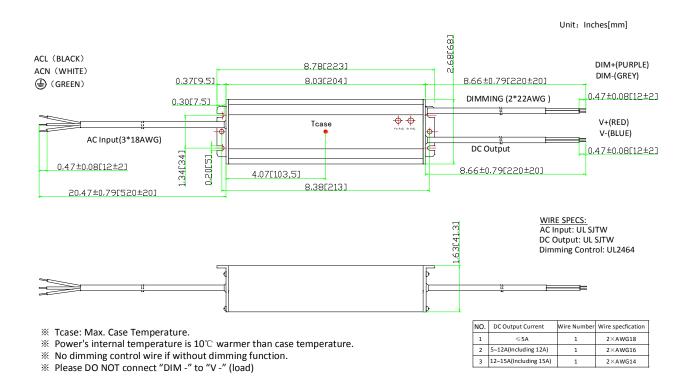

■ Typical LED power supply I-V curve

■ Mechanical Outline

■ "A" option

- a. Output voltage and current can be adjusted by internal potentiometer.
- b. IP65.
- c. These products shall be enclosed in the end product, when the unit provided with voltage and current adjustable holes.

■ "-TA" option: DALI dimming

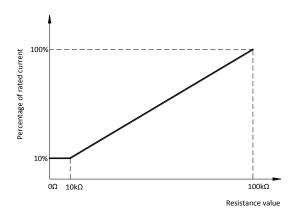

- a. DALI Testing Software: Please refer to www.impowercorp.com for downloading.
- b. Percentage of rated current: 10%~100%.
- c. "TA" version LED driver shall work with a DALI Master and DALI Master control software.

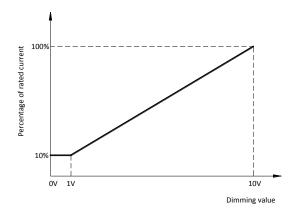

■ "-TC" option: 0-10V, resistance & PWM dimming

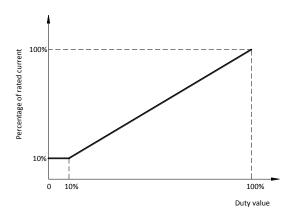

a. Reference resistance value for output current adjustment (Typical)

b. 0-10V dimming function for output current adjustment (Typical)

c. 10V PWM signal for output current adjustment (Typical): Frequency range: 200Hz~1.5KHz

Dimming control details:

Parameters		Minimum	Typical	Maximum
	Resistance	0kΩ	0-100kΩ	∞
Dimming Type	Voltage	-2V	0-10V	15V
	PWM(10%~100% f=200Hz~1.5KHz)	-2V	0-10V	15V
Dimming Current		-0.5mA	-	0.5mA

■ "-TE" option: Customized timeshare dimming.

- a. Different output current (10% 100% rate output current) can be set for different time periods.
- b. Maximum 4 sections is available. The minimum length is 0 to maximum 12 hours for each section.
- c. The parameter can't be changed after shipping.

"-TF" option: Programmable timeshare dimming.

- a. Output current is programmable with the range of 10%~100% of rated output current.
- b. Maximum 4 sections timeshare dimming is available. The minimum length is 0 to maximum 12 hours for each section.

For example:

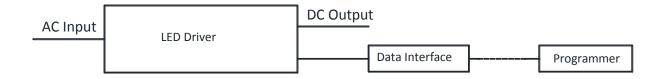

The first section: the time period is $0^{\sim}1h$, the output current is 40% of rated output current.

The second section: the time period is $\underline{1h} \sim 4h$, the output current is $\underline{100\%}$ of rated output current.

The third section: the time period is $4h^8h$, the output current is 40% of rated output current.

The fourth section: the time period is $8h^{12h}$, output current is 60% of rated output current.

- c. The parameters are set by a programmer.
- d. The data interface is waterproof.

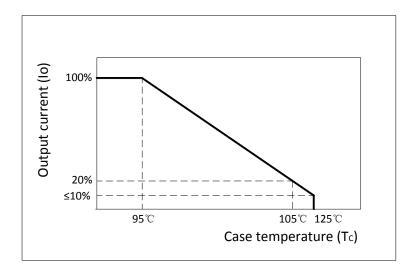

■ Input and output Dielectric strength

Isolation	Input Wires	Output Wires	Isolated Dimming Control Wires	Chassis
Input Wires	NA	3750	2000	1560/2000(remove discharge tube)
Output Wires	3750	NA	2000	2000
Isolated Dimming Control Wires	2000	2000	NA	2000
Chassis	1560/2000(remove discharge tube)	2000	2000	NA

■ Fixed derating-cutoff type temperature protection
