

# Infrared CO2 Sensor Module (Model: MH-Z1311A)

## User's Manual

(Version 1.4)

Issue Date. 2023.04.17

Zhengzhou Winsen Electronics Technology Co., Ltd

ISO9001 Certificated Company

## Statement

This manual's copyright belongs to Zhengzhou Winsen Electronics Technology Co., LTD. Without the written permission, any part of this manual shall not be copied, translated, stored in database or retrieval system, also can't spread through electronic, copying, record ways.

Thanks for purchasing our product. In order to let customers use it better and reduce the faults caused by misuse, please read the manual carefully and operate it correctly in accordance with the instructions. If users disobey the terms or remove, disassemble, change the components inside of the sensor, we shall not be responsible for the loss.

The specific such as color, appearance, sizes &etc., please in kind prevail.

We are devoting ourselves to products development and technical innovation, so we reserve the right to improve the products without notice. Please confirm it is the valid version before using this manual. At the same time, users' comments on optimized using way are welcome.

Please keep the manual properly, in order to get help if you have questions during the usage in the future.

## MH-Z1311A NDIR CO2 Module

### Profile

MH-Z1311A carbon dioxide gas sensor (hereinafter referred to as the sensor) is a general-purpose, small-scale sensor that uses the principle of non-dispersive infrared (NDIR) to detect CO<sub>2</sub> in the air. It has good selectivity, no oxygen dependence, and long life. , Built-in temperature compensation, digital output, easy to use. The sensor is a high-performance sensor made by closely combining mature infrared absorption gas detection technology with precise optical circuit design and sophisticated circuit design.

### Applications

- \*HVAC refrigeration
- \*Air cleaner device
- \*Indoor air quality monitoring
- \*Smart home
- \*Ventilation system

### Main Features

- \*The air chamber adopts electroplating treatment, waterproof and anti-corrosion
- \*High sensitivity, low power consumption
- \*Excellent stability
- \*Temperature compensation, excellent linear output
- \*Provide serial port (UART) output mode
- \*Long lifespan
- \*Anti-water vapor interference, anti-poisoning

### Main parameters

Model No.	MH-Z1311A
Detection Gas	CO <sub>2</sub>
Working voltage	5.0 ± 0.1V DC
Average current	150uA (@5V power supply)
Peak current	90mA (@5V power supply, 1s measurement interval)
Interface level	3.3 V (Compatible with 5V)
Detection Range	0~10000ppm(optional)
Output signal	Serial Port (UART) (TTL level 3.3V)
Preheat time	10s
Response Time	T <sub>90</sub> < 60 s
Working temperature	-10 ~ 50 °C
Working humidity	0 ~ 95% RH (No condensation)
Weight	5 g
Lifespan	> 10 years

### Detection range and accuracy

Detection Gas	Formula	Detection Range	Resolution	Accuracy
Carbon Dioxide	CO <sub>2</sub>	0~2000ppm	1ppm	± (30ppm+3% reading value)(15~35℃)
		0~5000ppm		± (10% reading value)(-10~15℃, 35~50℃)
		0~10000ppm		

### Dimensions

### Pins connection type:

Pin	Pin Definition
Pin 1,2,5-7	Reserved
Pin 3	UART (TXD) 0~3.3 V data output
Pin 4	UART (RXD) 0~3.3 V data input
Pin 8	GND
Pin 9	VIN

3. The optical cavity of the sensor should be clean and free of dust. The sensor should be used in a clean environment. The sensor should be used in a clean environment. The sensor should be used in a clean environment.

4. The sensor should be used in a clean environment. The sensor should be used in a clean environment. The sensor should be used in a clean environment.

5. The sensor should be used in a clean environment. The sensor should be used in a clean environment. The sensor should be used in a clean environment.
