SENSOR SWITCH

| Item.\# | RBS02 Series | Description | ROLL BALL SWITCH | Version | V101.0 |
| :--- | :---: | :--- | :--- | :--- | :---: |
| Page | 1 of 15 |  | Date | Feb. 09, 2012 |  |

- FUNCTIONS

1. Horizontal Tilt Detecting
2. Vertical Rotation Detecting
3. Shock Detecting

- APPLICATIONS

1. Screen Rotation

2. Web Camera
3. Alarm System
4. Iron Position Detecting
5. Bicycle lights flashing
6. Step Counter

## - FEATURES

1. Tiny size, suitable for small space.
2. Wing-shaped terminals, a feature enables half body of the sensor switch to be buried into PCB.
3. No electricity consumption during detection status.
4. Gold-plated ball and terminals, low possibility of oxidization.
5. All plastic materials subject to industrial purpose, resist high temperature and meet fireproof function.
6. Simple ON and OFF signals, easy for design.
7. RoHS compliance, an ideal substitute for mercury switch.
8. A more economical tilt and rotation detection option than IC design solution.

## SENSOR SWITCH

| Item.\# | RBS02 Series | Description | ROLL BALL SWITCH | Version | V101.0 |
| :--- | :---: | :--- | :--- | :--- | :---: |
| Page | 14 of 15 |  | Date | Feb. 09, 2012 |  |

※ Package shown as below for reference.

- NOTES

1. Suggestion for usage : For vibration usage or application , we suggest to add "on delay" for IC; if vibration is heavy , optical type of sensor switch is recommended.
2. Recommend using 5 mA as input current.
3. For the continued product improvement as one of the company policy, specifications may change or update without notice. The latest information can be obtained through our sales offices. Normally, all products are supplied under our standard conditions.
4. Conductive rate (Switch-on Rate): To test the conductivity of one switch individually for 100 times, if the switch got 95 times of "ON" , we call the its "conductive rate" is 95\%. IEC TVGC

## - PRECAUTIONS FOR USE

1. If the products is intended to be used for other endurance equipment requiring higher safety and reliability such as life support system, space and aviation devices, disaster and safety system, it's necessary to make verification of conformity or contact us for the details before using.
2. Do not try to clean the switch with a solvent or similar substance after the soldering process.
3. Use water-soluble flux may damage the switch.
4. If soldering temperature exceeds our specification, sensor switch could get apart.
5. Do not use switch in the environment of high humidity, because such an environment may cause the leakage current between the terminals.
6. More than the rated load may cause fire, so do not use more than the load.
7. In the circuit, switch should not be near or directly connected with the magnetic component solder joints (for example: relays, transformers, etc.).
