#### **FEATURES**

- Isolated package
- High voltage isolation = 2.5 kV<sub>RMS</sub> (t = 60 s; f = 60 Hz)
- Sink to lead creepage distance = 4.8 mm
- P-channel
- Dynamic dV/dt rating
- Low thermal resistance
- Material categorization: for definitions of compliance please see <u>www.vishay.com/doc?99912</u>

#### DESCRIPTION

Third generation power MOSFETs from Vishay provide the designer with the best combination of fast switching, ruggedized device design, low on-resistance and cost-effectiveness.

The TO-220 FULLPAK eliminates the need for additional insulating hardware in commercial-industrial applications. The molding compound used provides a high isolation capability and a low thermal resistance between the tab and external heatsink. This isolation is equivalent to using a 100 micron mica barrier with standard TO-220 product. The FULLPAK is mounted to a heatsink using a single clip or by a single screw fixing.

| ORDERING INFORMATION |                |
|----------------------|----------------|
| Package              | TO-220 FULLPAK |
| Lead (Pb)-free       | IRFI9610GPbF   |
